

DEATON ENGINEERING
YOUR VISION, OUR PRECISION

You Have a Vision.

And now you have a partner to help you realize it. We're a full-service engineering company offering a wide variety of solutions and services to a broad range of industries since 1991. Our talented specialists with applied experience and an excellent command of the tools of the trade partner with you to engineer answers.

Designed & built the award-winning Briggo Coffee Haus automated coffee kiosk that replicates techniques used by elite baristas with the precision and repeatability that comes with robotics.

"From the earliest concept, Deaton's team of dedicated engineers applied their broad range of skills and experience to create the world's first autonomous robotic specialty coffee platform. This innovation ushered in a wave of autonomous food and beverage delivery systems currently in development around the world."

— C. Studor, Founder/CTO of Briggo, Inc., CTO of NowCuisine.com

JUKKA JUKKA Approached Deaton Engineering to help reimagine the vending machine. Together, we prototyped and field tested an innovative automated foodservice kiosk that can service hundreds of swing shift employees, with timely safety features.

"Deaton Engineering has provided exceptional engineering services & intelligence to JUKKA Inc. since our founding 5 years ago. Our experience has been that Ed Deaton and his team of DEI engineers are amazingly qualified & technically proficient – but just as importantly they are tenacious problem solvers. DEI immediately embraced our project vision, and led the transformational design & technology of our automated robotic vending equipment that is now set to further evolve the foodservice industry ..."

— John Serieka, COO of JUKKA Inc.
